PRODUCT SPECIFICATIONS SHEET

COMBO®

Manufacturer's Concentrate of Bacteria, Yeast, and Enzymes for use in Animal Feed

COMBO® can be added directly to an on-the-farm mix or incorporated as part of a dry premix (max moisture 15%) to give the required feeding rate. Do not allow this product to remain in moist feed for more than 12 hours.

Recommended Usage Levels:

Dairy: Calculate feeding rate to give 0.75 oz. (21 grams) per head per day starting 30 days before freshening and continuing throughout the lactation cycle. For stress conditions such as high daytime temperatures, increase feeding rate to 1 oz. (28 grams) per head per day.

Calves: Feed 0.50 oz. (14 grams) per head per day starting at first solid feed.

Beef: Feed at the rate of 2-3 lbs./ton (1-1.5 Kg./M.T.) of finished feed.

Swine: Feed 2-3 lbs. per ton (1-1.5 Kg./M.T.) of finished feed to the growing and finishing stock from first solid feed through finishing. Feed 1-1.5 lbs./ton (0.50-0.75 Kg./M.T.) of finished feed to all breeding stock. Experience may indicate that these feeding rates can be reduced or should be increased by 25%.

Poultry: Add at the rate of 2-3 lbs./ton (1-1.5 Kg./M.T.) of finished feed.

Horses: Feed 0.50 oz. (14 grams) daily in the P.M. feeding bucket.

Sheep/Goats: Feed at the rate of 2-3 lbs./ton (1-1.5 Kg./M.T.) of finished feed.

Storage Conditions: For optimal activity store in cool dry place under 100°F (37°C). Standard shelf life under these conditions is 2 years.

Danger: May cause allergy or asthma or breathing difficulties if inhaled. Avoid breathing dust/fume/gas/mist/vapors/spray. In case of inadequate ventilation, wear respiratory protection. Consult safety data sheet before handling and storing this product.

Packaging: Product is double bagged in double walled 12x12x15 boxes containing 50lbs./25Kg or 1,000 Kg. and 2,000 lb. bulk bags
